

## Environmental Policy

Protection of the environment is of major concern to Maritime Paper Products and our employees. We, along with all citizens, share an important responsibility for the environment in which we work and live.

It is our belief that economic development and environmental stewardship go hand in hand with prosperity and quality of life. We believe that it is important to have a set of principles to govern our attitudes and actions in environmental matters.

In this spirit, I am pleased to present Maritime Paper Products' Environmental Policy.

G.A. Johnson  
President

## Our Product

**Corrugated is by far the most widely recovered packaging material in Canada with a national recovery rate estimated in the 80% range.** Source: PPEC

- We are pleased to provide packaging that is 100% recyclable.
- The recycled content of our raw materials averages 75%.
- We can certify 100% recycled content of raw materials upon customer request.
- We are committed to recovering 100% of our process waste for recycling or reuse.

## Our Commitment

*Maritime Paper Products will*

- Plan, construct and operate its facilities to meet or exceed all applicable environmental regulations.
- Apply sound management practices to advance environmental protection and minimize environmental impact.
- Promote environmental awareness amongst employees and train employees in environmental responsibility.
- Work with customers on "Source Reduction" through design initiatives.
- Educate and encourage customers to recycle corrugated.
- Conduct business in a responsible manner designed to not only protect the environment, but also the health and safety of employees, customers, and the public.
