

MARITIME PAPER

Packaging Forward

To our valued customers,

As global concerns increase around COVID-19, the health, safety and wellbeing of our employees, customers and suppliers remain our top priority. We are closely monitoring the situation and listening to the recommendations of experts, including guidance from the World Health Organization (WHO), Canadian public health authorities and local governments.

We have been working on our Pandemic protocol since January and we have implemented a number of initiatives to help maintain a safe working environment. We are encouraging employees to diligently follow the prevention recommendations provided to us by health authorities. We are communicating regularly with our employees to ensure they have the necessary facts and tools to deal with this ongoing situation at the workplace, and in their personal lives.

At each location we are limiting access to our facilities for nonessential personnel and we are also asking our sales group to refrain from face to face meetings. Our sales team is committed to maintaining our high level of service and they are equipped to have video or phone conferences should the need arise.

In terms of Maritime Paper's ability to supply your packaging requirements, we are fully functioning in all locations throughout the Atlantic Provinces and we continue to discuss supply logistics with our strategic partners.

Should you require any further clarification please do not hesitate to reach out to your local sales rep, or directly to myself.

Sincerely Yours,

Geoff Morse
Sales & Marketing Manager
Maritime Paper Products
