

EnviroShield One

Protective Coating Technology

EnviroShield One Coatings are 100% recyclable, FDA and CFIA approved, **wax alternatives** which allow once landfill-bound corrugated packaging to enter the recycling stream. Their development was part of Maritime Paper Product Limited's EcoAdvance Program - eco-minded innovations evolved from an enduring commitment to energy conservation.

Three levels of **water barrier protection** were created specifically for a range of product protection. The application can be customized with **EnviroShield One**, **EnviroShield Plus** or **EnviroShield Premium**.

Rethink. Reach out. Realize the potential.

"Analyzing and improving packaging not only makes good business sense but it gives our customers the ability to seamlessly manage modern regulations and communicate sustainability commitments to their own clients, creating a whole host of other benefits."

EnviroShield One

EnviroShield One boasts light barrier protection which is both economical and effective. Recommended for packaging of frozen seafood, meat and various frozen fruits and vegetables.

light water barrier	✓	
medium water barrier		
maximum water barrier		
provides printable surface	✓	
receives cold set glue	✓	
receives hot melt glue		
conforms to FDA/CFIA	✓	
fully repulpable	✓
